## CAREER SUMMARY

My career goal is to be a Full-Stack web developer. This is a big opportunity to explore how I have developed myself as a Backend developer past 2 years gaining knowledge. I have completed the course on PHP and Laravel Backend Developer from the PencilBox Institute SEIP Project. And I also learning JavaScript, jQuery to gain my frontend knowledge with the React JS framework. This opportunity will help me to grow on my career path.

## PROJECTS

10/2024 – present

### **E-commerce**

Develop a fully functional e-commerce platform that allows customers to browse, purchase, payment and manage products, while enabling the admin to oversee inventory, orders, customers, and overall site performance.

08/2024 – 09/2024

### **Job-Board Application**

I built an application for job seekers and Job placers. Job seekers can filter their job category, expert label, and expected salary range. They can also see applied jobs and related information. After applying, users can see their job information.

The job placer maintains the Job post and adds new jobs. Applied user information and their documents can be handled.

### **Other Project, REST-API, JQuery AJAX, Inertia with ReactJS**
